

Science Report

Question my experiment is answering:	
Hypothesis: I think....	
Variables	<i>What are you changing?</i> <i>What are you measuring?</i> <i>What stays the same?</i>
Fair Testing How will you make this is a fair test?	
Materials: List all of the materials and equipment needed to carry out the experiment.	
Method: Numbered Steps	

<p>Results: This is a record of what was observed and measured during the experiment.</p>	
<p>Discussion :</p>	<p>What does the experiment tell us?</p> <p>What does the experiment NOT tell us?</p> <p>How could the experiment be improved?</p>
<p>Conclusion:</p>	<p>Was your prediction in your hypothesis correct? Explain your answer.</p> <p>How could the results of your experiment help people in the 'real world'?</p>
